IMPACT TYPE WIRE ROPE CUTTERS

Striking with a hammer actuates these cutters; they cut with only a few hammer blows. They are precision engineered to deliver a clean cut without affecting the original roundness of the wire rope. The blades and dies are made of tool steel, heat treated and ground to close tolerances.

MANUALLY OPERATED WIRE ROPE CUTTERS

These self-contained hydraulic cable cutters are precision-engineered tools designed to give a clean cut with minimal effort. Just pump the handle...no outside power is required. This self-contained portable tool can be easily carried. All three models will operate under water. The blades and die sets are made of tool steel, heat treated and ground to close tolerances.

MODEL	MAX. CAPACITY	DIMENSIONS	WEIGHT
W 075	3/4" Wire Rope	12" x 3-1/2" x 6" high	21 lbs.
P 1125	1-1/8" Wire Rope	14" x 4" x 7" high	34 lbs.
C 1750	1-3/4" Wire Rope	19" x 5" x 8" high	66 lbs.

POWER OPERATED WIRE ROPE CUTTERS

These cutters require an external hydraulic power source for operation. They can be activated by any electric, gasoline, hand, battery or air operated hydraulic pump capable of developing 10,000 PSI and having free flow return through the pressure line. The pumps are hose-connected to the body of the cutter.
