

Hidden Edge® Utility Knife

The Hidden Edge® Utility Knife is the latest addition to Starrett's ProSite™ Series of professional tools.

This innovative knife keeps the blade safely tucked away when not in use, yet instantly available by simply releasing the safety lock and squeezing the lever to the knife body.

The cutting depth is easily and accurately adjusted with a thumbwheel. With quick release blade change and storage for spares in the lever, blade changes are fast, safe, and tool-free - you **do not** have to take this knife apart to change the blade.

An optional belt holster is also available. Hidden Edge® represents a new level in the evolution of utility knives. After only a few hours, you will wonder how you ever got by with your old-fashioned knife.

Optional Hidden® Edge Holster
